

**Unilin Group Division Flooring  
Luxury Vinyl Tile produced in Avelgem, Belgium**

Wielsbeke, August 2023

## REACH DECLARATION

Dear,

*To whom it may concern.*

As a global manufacturer of resilient floorcovering, Unilin Group Division Flooring is very concerned about all issues dealing with environment and the impact of our products on life. REACH is one element of this international ambition for a better environment.

Unilin Group Division Flooring is in the REACH terminology a so-called downstream user of chemical substances. We use different chemicals in the production of our floor product. As a downstream user we comply with following REACH obligations:

- Pre-registration: all Unilin Group Division Flooring suppliers of REACH concerned materials are checked on their pre-registration of material. Suppliers and materials that are not in total conformity with REACH within the appropriate time schedule will be refused.
- Unilin Group Division Flooring supplies all necessary information about the application of chemicals in our product. This to allow all suppliers to prepare accurate exposure scenarios.
- If necessary Unilin Group Division Flooring will give written notification of the composition of our product as well as all appropriate safety sheets.

REACH also considers Unilin Group Division Flooring as an importer of chemicals. Therefore we guarantee the pre-registration and registration of all chemicals we import from outside the EU and in minimum volumes of 1 T/yr within the appropriate timing.

Unilin Group Division Flooring guarantees its customers all necessary measurements are taken to assure a perfect regulation of all its resources following all REACH prescriptions.

Please feel free to contact us for any question you may have.

Best regards,
